

## Manufactured Salt Brine “MSB”

RMES **Manufactured Salt Brine (MSB)** is a straight Sodium Chloride Brine produced specifically for pre-wetting and anti-icing applications. We manufacture the brine at our own production facilities using pure rock salt and potable water.

**MSB** has a sodium chloride concentration of  $23.3\% \pm 0.3\%$ , making it ideal for its intended use as a pre-wetter and anti-icing solution. The eutectic point of 23.3% sodium chloride brine is approximately  $-21^{\circ}\text{C}$ .

There are no other added chemicals in **MSB** – only water and rock salt. With consistent brine such as this, you can now reduce the risk of unexpected re-freeze and slippery road conditions due to inconsistent chloride blends.

Accurately recording and analyzing the results of your snow fighting efforts is now an integral part of every Salt Management Plan. **KNOW YOUR BRINE!**

### **Manufactured Salt Brine**

from **RMES** allows you to rest assured that each and every load will produce the same results on the road.

**MSB** is available in bulk tanker loads. **RMES** offers self unloading trucks that deliver right to your location.
